About

8+ years of design and engineering leadership experience in Product Management. Direct experience as a co-founder as well as a product executive. Graduate of R.I.T. with a degree in Applied Science.

Experience

Strategic Consultant, Various Clients - *Remote*

March 2010 - Present
Assisting clients with product management and development, as well as compliance and security. Sitting member on the HITRUST 3rd-party assurance council.

Sample client list:

- [Datica](#)
- [Plaid](#)
- [WayUp](#)
- [DivvyCloud](#)

Chief Product Officer & Chief Security Officer, Datica - *Minneapolis, MN (Remote)*

March 2018 - March 2020
Built and launched a cloud compliance monitoring platform that will lead the future product strategy for the company.

Worked directly with Datica customers to identify features and lead research sessions. Led a team of 20+ product engineers, product managers, UI/UX designers, and security engineers/architects.

Wrote the comprehensive guide to cloud compliance for healthcare. Created the most successful open source compliance policy project on [github](#).

Vice President of Product, Datica - *Minneapolis, MN (Remote)*

March 2017 - March 2018
Developed and launched a compliant Kubernetes service for digital health startups. Led a research team in identifying security gaps within existing Kubernetes services to disrupt.

Worked directly with AWS as a leader in the healthcare space to create product marketing materials for cross sale.

Director of Design, Catalyze - *Madison, WI (Remote)*

Jan 2014 - March 2017

Led the development of product design systems and built out a functioning style guide used by development, product and design teams. Hired and mentored key employees.

Led the design, development and launch of Datica.com — including a comprehensive rebrand.

Web Developer, GlobalThinking - *Washington, DC*

May 2013 - Jan 2014

Developed a web product for Volkswagen USA for ordering physical marketing material. Developed the season ticketing website for the Washington Capitals hockey team.

Education

Rochester Institute of Technology (R.I.T) - *B.S. in Applied Science*

Studied systems design and software engineering.
